

ZANDILE MONALISA DLADLA

COMPUTER SCIENCE GRADUATE • BSc (HONS) CANDIDATE

zandiledladla033@gmail.com
<https://github.com/zandiledladla> | <https://www.linkedin.com/in/zandiledladla>

PROFESSIONAL SUMMARY

Computer Science graduate and current BSc Honours candidate with practical experience across software development, machine learning, cloud applications, databases, networking and IoT. Built projects using Python, JavaScript, Java, SQL, Firebase and AWS, including a hybrid misinformation-detection system and a deployed AI-powered leadership platform. Strong foundation in SDLC, Agile collaboration, debugging, testing and technical problem-solving, with a demonstrated ability to learn new technologies and translate requirements into practical solutions.

TECHNICAL SKILLS

Programming: Python, JavaScript, Java, C, C++, Swift, SQL	Web & APIs: HTML/CSS, REST APIs, TanStack Query, frontend-backend integration
Cloud & Backend: Firebase, Firestore, Cloud Functions, AWS EC2, S3, RDS, IAM	AI & Data: Machine Learning, NLP, TF-IDF, scikit-learn, pandas, NumPy
Databases: SQLite, MySQL, Amazon RDS, CRUD applications, query optimisation	Systems: Socket programming, threading, queues, UDP/TCP, concurrency, IoT
Development: Git, SDLC, Agile/Scrum, OOP, data structures and algorithms	Quality: Testing, debugging, error handling, logging, troubleshooting

EDUCATION

Bachelor of Science (Honours) in Computer Science | University of the Western Cape | 2026 – Present

- Current GPA: 4.0.
- Relevant coursework: Advanced Software Engineering, Computer Science Project Analysis, Computer Science Project Implementation, Internet of Things, Big Data Engineering, Cybersecurity, Artificial Intelligence and Reinforcement Learning.

Bachelor of Science in Computer Science | University of the Western Cape | Completed 2025

- Majors: Computer Science, Mathematics and Information Systems. Awarded UWC Mentor of the Term.

CERTIFICATIONS

AWS Cloud Practitioner Essentials | AWS Training & Certification | July 2025

Amazon RDS Service Primer | AWS Training & Certification | July 2025

SELECTED TECHNICAL PROJECTS

Misinformation Detection System | Python | NLP | scikit-learn | Gradio | [GitHub](#)

- Developed a hybrid prototype comparing TF-IDF and Logistic Regression with interpretable rule-based linguistic analysis on the LIAR dataset.
 - Implemented preprocessing, model evaluation, confidence scoring and an interactive interface; baseline ML model achieved 68.15% validation accuracy.
- ShiftWyse – AI-Powered Leadership Platform** | JavaScript | Firebase | Cloud Functions | Gemini | [Live Demo](#)
- Contributed to document and requirements analysis, project planning, selected implementation tasks and testing for a deployed multilingual nurse-leadership platform.
 - Supported features including AI coaching, assessments, mentor discovery, voice interaction and POPIA-aligned consent and data-management workflows.

SELECTED TECHNICAL PROJECTS (CONTINUED)

Distributed Task Processing Simulation | Python | Threading | Queues | [GitHub](#)

- Independently designed a producer-consumer simulation that generates tasks, distributes work across threads and retries failed jobs up to three times.
- Demonstrated self-directed learning in concurrency, queue coordination, fault handling and graceful shutdown behaviour.

Relational Database CRUD Application | Python | SQLite | SQL | [GitHub](#)

- Built a command-line student-record manager supporting complete create, read, update and delete operations with persistent SQLite storage.
- Implemented database logic, menu-driven interaction, input handling and functional testing.

Sound Level Monitoring System | Python | Raspberry Pi | UDP | IoT | [GitHub](#)

- Contributed to hardware setup and microphone-sensor integration for a real-time sound-monitoring system with threshold-based client alerts.
- Tested UDP communication and troubleshooted hardware, networking and software-integration issues within a university team project.

ADDITIONAL TECHNICAL PROJECT & EXPERIENCE

Developer Portfolio Website | HTML | CSS | JavaScript | GitHub Pages | [Live Site](#) | [GitHub](#)

- Designed and developed a responsive, accessible portfolio with data-driven project cards, five detailed case studies and a privacy-safe CV download.
- Migrated the site to an independently hosted GitHub Pages deployment, optimised project media for performance and maintained the source in a public repository.

Standard Bank UniHack Hackathon | Participant | 2025

- Collaborated in a team to deliver a working software prototype within 48 hours and supported debugging, testing and the final demonstration.

LEADERSHIP & INVOLVEMENT

Mentor – First-Year Student Support Programme | 2024

- Selected as a First-Year Mentor at UWC; fostered belonging and connection among first-year students and supported their transition to university life.

Emerging Leaders Programme | UWC Office for Leadership and Social Responsibility | 2023

- Selected to participate in a structured leadership-development programme covering teamwork, conflict and time management, motivation, emotional intelligence, creativity, organisational leadership and social responsibility.

IoT / Robotics Club | Volunteer | 2025 – Present

- Assisted with sensor setup, coding environments and collaborative debugging of Raspberry Pi hardware-software prototypes.

UWC IT Society | Member | 2023 – Present

- Participated in coding workshops, technology talks and peer-learning initiatives.
